Networking Academy

Certificate of Course Completion

Much. Trie Harnanto

has successfully achieved student level credential for completing the **Endpoint Security** course.

The student was able to proficiently:

- Explain how types of data can present unique challenges, with examples.
- Document and recommend threat mitigation measures for common and emerging network threats that are relevant to a given organization.
- Configure a simulated network according to organizational requirements.
- Analyze malware files that have been extracted from packet captures.
- Evaluate endpoint security.
